

Data Analysis and Interpretation

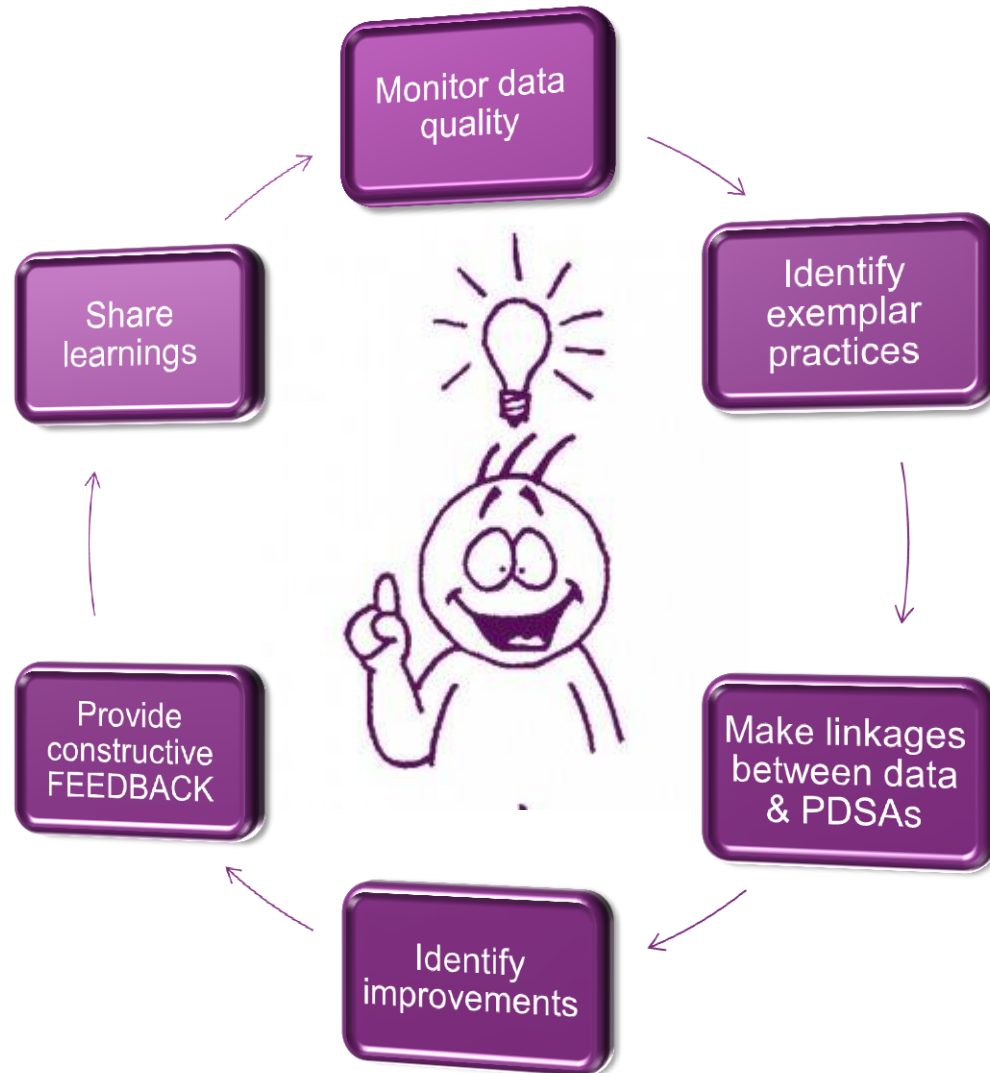

Understanding Data

Analysis needs to occur for us to make sense of the data

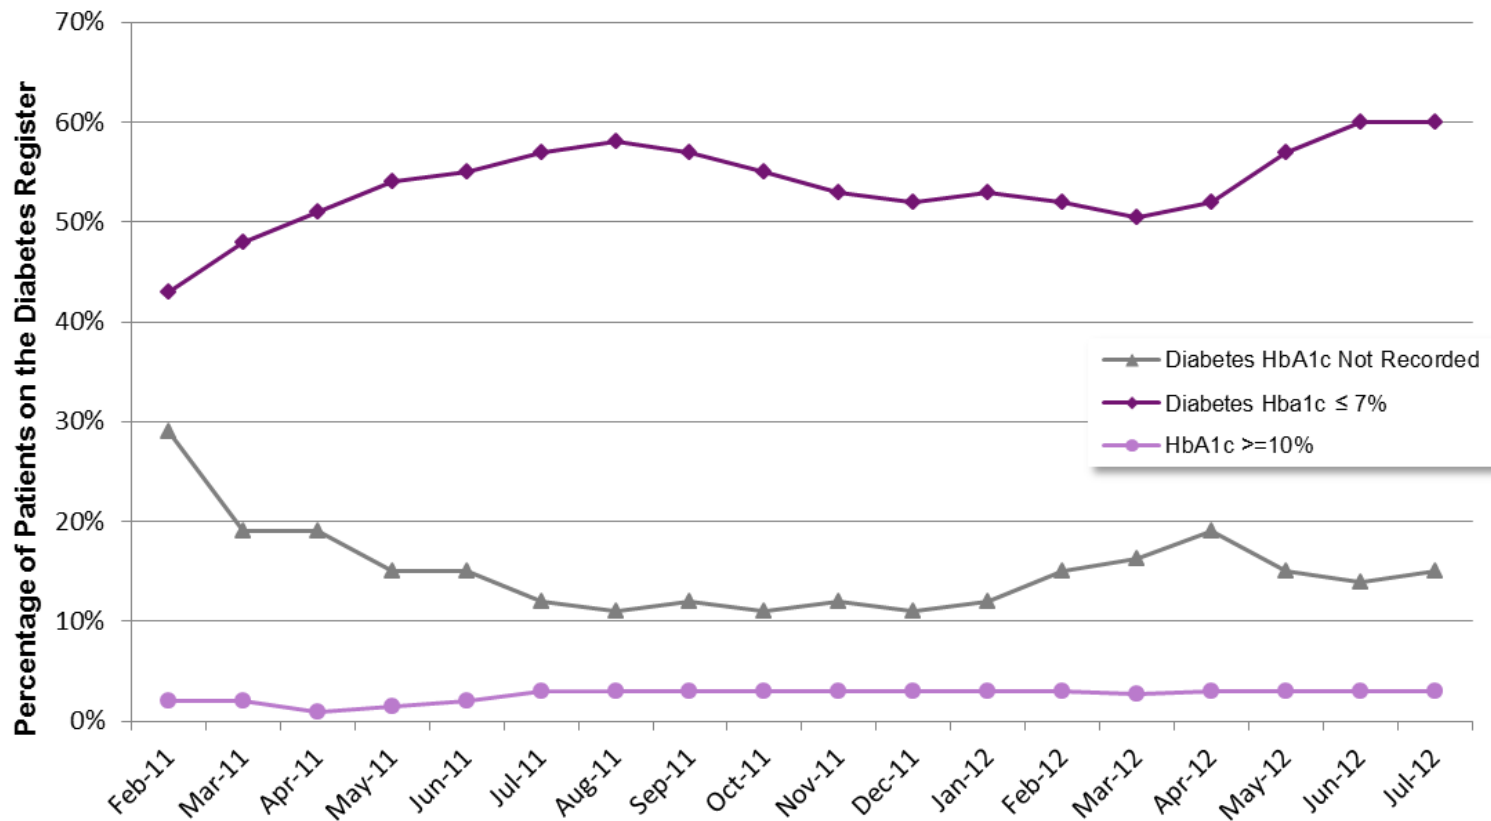

The web portal is a valuable tool that supports data analysis:

- Monitor data submissions/completeness
- Review and interpret month on month graphs
 - Identify and track trends
 - Identify areas for improvement
 - Draw comparison between health service data and Medicare Local / Wave averages
- Extract monthly raw data
- Review PDSAs

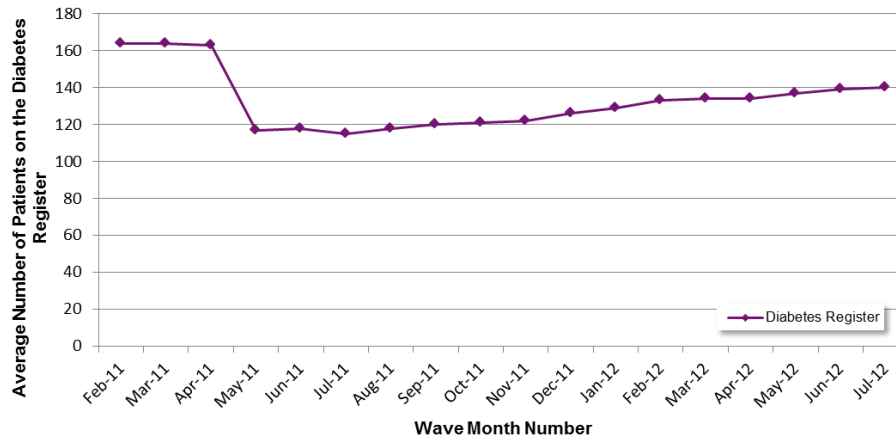

Why is it important to understand the data?

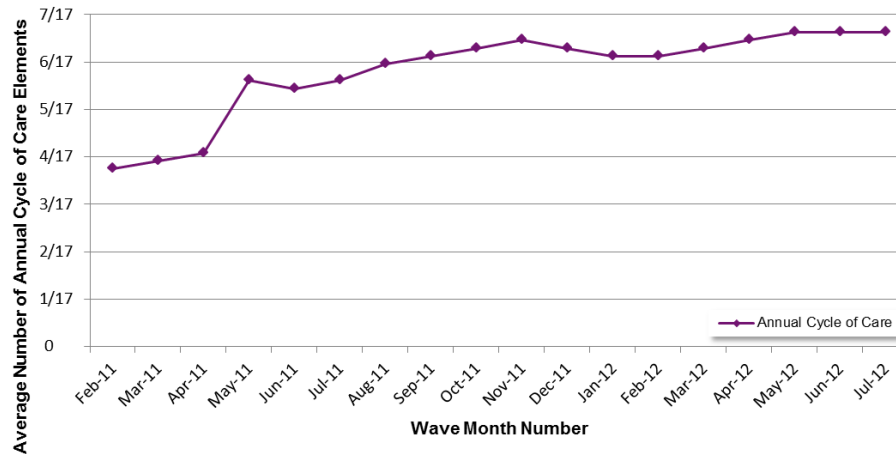

Diabetes Management Topic - Diabetes HbA1c

Australian Primary Care Collaboratives Program Wave 6 - Diabetes Management Topic - Diabetes Register

Australian Primary Care Collaboratives Program Wave 6 - Diabetes Management Topic - Diabetes Annual Cycle of Care

Group exercise

- What is happening in your practice?
- Can you see any trends or patterns, what can you infer?
- Can the PDSAs support what you find in the data?
- Are there any concerns or issues that you have found?
- Can you make suggestions for improvement based on the information?
- Make notes of your commentary

Feedback session

- What questions did you ask as a group when looking at the data
- Interesting discoveries and learning's
